

CLAIMS:

The claims of record, claims 1 to 19 are withdrawn.

The applicant now provides new claims 20 to 39. New claims 20 to 39 contain double spaces between the lines, as directed.

The applicant submits that new claims 20 to 39 provide sufficient antecedent to overcome the ground for rejection raised by the Examiner against original claims 1 to 10.

The new claims also now recite structural features of the present invention which effectively overcome the ground for rejection against original claim 11 and also 13 to 19 citing WEISSLER (US 5,046,508).

A new claim 12, which the Examiner acknowledged did recite patentable material, is also provided in accordance with the Examiner's proposed corrections.

Yours sincerely

A handwritten signature in cursive script, appearing to read "B. Sharpe".
